At.Post Atpadi Dist. Sangli, Maharashtra, India-416312

Objective

A passionate and motivated data science enthusiast with a strong foundation in Python, machine learning, and data analysis. Seeking an entry-level data analyst role to apply analytical and technical skills to solve challenging business problems and contribute to data-driven decision-making.

Skills

- Programming Languages: Python, C, Java
- Data Analysis and Visualization: Pandas, NumPy, Matplotlib, Power BI.
- Databases: MySQL
- Data Cleaning, Data Processing
- Exploratory Data Analysis
- Jupyter Notebook

Projects

Language Detection and Translation System

- Developed a system to detect the language and translate it into other languages including Hindi, Marathi, and English.
- Implemented a machine learning model to accurately detect languages.
- Created a user-friendly interface for seamless interaction.
- Technologies: Python, Pandas, NumPy, Django.

EDA on IPL-2022

- Conducted exploratory data analysis on IPL-2022 data to uncover trends and patterns.
- Visualized key insights using interactive charts and graphs.
- Technologies: Python, Pandas, Matplotlib, Seaborn.

E-commerce Sales Dashboard (Power BI)

- Created an interactive sales dashboard to analyze e-commerce data, including sales, profits, and quantities sold.
- Provided insights into customer behavior, payment methods, and profit trends by category and sub-category.
- Technologies: Power BI.

Education

Bachelor of Technology in Computer Science Engineering
D. Y. Patil College of Engineering & Technology Kolhapur.
CGPA:8

Certifications

Google Data Analytics (Coursera)
Python For Data Science (NPTEL)

Virtual Internship | Accenture (via Forage)

Data Analytics and Visualization Job Simulation

October 2024

- Completed tasks in project understanding, data cleaning, modeling, and storytelling.
- Analyzed datasets to derive insights and prepared client presentations.
- Gained practical experience in data visualization and storytelling techniques.
