Summary

Full Stack Developer with skills in MERN Stack, React, Java, JavaScript, HTML, CSS, and MongoDB. Strong foundation in Data Structures, Algorithms, OOP, DBMS, and web development. Quick learner with good problem-solving, communication, and teamwork skills, seeking opportunities to contribute and grow as a software developer.

Education

B.Tech in Computer Science and Engineering, CGPA: 7.3

D.Y. Patil College of Engineering, Kolhapur

Class 12 (HSC) – 67% 2021-22

P. D. V. P. Tasgaon.

Skills

Programming & Backend: Java, Python, C++, REST APIs, Node.js, Express.js

Frontend & Frameworks: React.js, HTML/CSS, JavaScript

Machine Learning & AI: TensorFlow, PyTorch, Basics of Big Data, Generative AI

Networking: Cisco Packet Tracer, TCP/IP

Tools & DevOps: CI/CD, Git, VS Code, Eclipse

Experience

Machine Learning Intern

Jun 2025 – July 2025

Worked as a Machine Learning intern, assisting in designing, developing, and implementing ML models for real-world datasets. Performed data preprocessing, feature engineering, and model evaluation to improve predictive accuracy. Gained hands-on experience with algorithms, Python libraries, and data analysis tools. Collaborated with the team to deploy ML solutions and optimize model performance for business applications.

Virtual Intern – Cisco Networking Academy

2025

- Completed training in routing, switching, and network security fundamentals.
- Designed and tested network topologies using Cisco Packet Tracer.

Projects

Network Based PC Monitoring and Control System

Tech Stack-Advanced Java, JavaFx, Socket(TCP/IP), SQLite

Description- A Network PC Monitoring and Control System is a software solution designed to monitor, manage, and control multiple computers on a local area network (LAN), especially useful in environments like schools, offices, labs, and training centers. It enables an administrator to track user activity, monitor real-time screen feeds, control access, and even remotely shut down or restart client systems

Aadhaar Based Complaint Registration System

Tech Stack - MERN stack, Socket (i/o)

Description - Developed a web-based Aadhaar Card Based Complaint System that authenticates users via OTP verification before lodging complaints. Ensures only verified citizens can submit grievances, preventing fake and duplicate complaints. Includes department-wise routing to forward complaints to the right authority automatically. Citizens can track complaint status in real-time through SMS and email notifications. Admin dashboard allows centralized monitoring, workflow management, and performance reporting.

Certifications

- Linked Learning Generative AI Certificate
- Fundamentals of Computer Networks
- Oracle Cloud Infrastructure Certified Data Science Professional
- Infosys SpringBoard AI/ML
